#### RESEARCH COMPLIANCE

Research activities involving the use of live animals (including euthanasia for tissue harvest), biohazards, or human subjects must be reviewed and approved by the appropriate TAMU regulatory research committee (i.e., IRB, IACUC, IBC) before the activity can commence. This requirement applies to activities conducted at TAMU and to activities conducted at non-TAMU facilities or institutions. In both cases, students are responsible for working with the relevant TAMU research compliance program to ensure and document that all TAMU compliance obligations are met before the study begins. Students are encouraged to reach out to the appropriate compliance office early.

For a list of activities that may require a compliance review, see the <u>Research Compliance and Integrity Toolkit</u>. For a list of activities that require IRB review, see the <u>HRP SOP-093</u>: Activities that Require IRB Review.

For research involving the use of human subjects, please contact <u>IRB@tamu.edu</u>. For research involving the use of biohazards, please contact <u>IBC@tamu.edu</u>. For research involving the use of animals, please contact <u>animalcompliance@tamu.edu</u>.

This is not an all-inclusive list of all possible required compliance approvals, so please check Research Compliance and Biosafety for full information.

It is strongly recommended that you complete <u>TrainTrag course 2112557: Introduction to Research Compliance Requirements</u> and review <u>Copyright Basics for Graduate and Professional Students</u> before submitting the proposal.

By completing and submitting this form, I certify that all research compliance requirements related to this proposal have been addressed prior to \* submission. I understand that if the research scope changes, those changes must be addressed with Research Compliance and Biosafety prior to implementation.
